Data & Visibility: SLA dashboards · Automated reporting · MySQL · Power BI (basic) · MS Office

PROFESSIONAL EXPERIENCE

Customer Success Manager | Raw Engineering | Jul 2023 – Present

- Spearheaded support operations for NBA and F1 Racing applications, maintaining a 99.8% uptime SLA across a global user base.
- Built automated reporting pipelines with Google Apps Script, eliminating 10+ hours of weekly manual reporting effort.
- Designed Slack webhook incident alerts that reduced mean time to acknowledge (MTTA) by 40%.
- Integrated REST APIs across internal tools, cutting manual data-entry errors by 60% and improving operational accuracy.
- Developed SLA dashboards that improved stakeholder visibility by 40% and supported data-driven quarterly business reviews.
- Reduced operational costs by 15% through tool consolidation, process re-engineering and automation.
- Implemented automated monitoring that reduced ticket resolution time by 30% and improved team throughput.
- Led cross-functional teams of 8+ across technical and business functions and conducted QBRs with C-level stakeholders.

Technical Support Engineer | Whitehat Education Technology | Sep 2020 – Jul 2023

- Achieved 95% CSAT through proactive issue resolution and personalized support strategies.
- Automated ticket categorization and escalation with Google Apps Script, reducing manual triage time by 30%.
- Created 200+ knowledge-base articles using AI-assisted workflows, deflecting 35% of routine support queries.
- Reduced average ticket handling time from 48 to 24 hours through process redesign and tooling improvements.
- Trained 25+ team members and migrated 3 legacy systems to modern platforms with zero downtime.
- Recognized as Employee of the Quarter twice for performance, innovation and mentorship.

SATISH KUMAR TIWARI

TECHNICAL OPERATIONS & CUSTOMER SUCCESS LEADER

PROFESSIONAL EXPERIENCE · CONTINUED

Associate Support Engineer | Times Internet | Jan 2019 – Sep 2020

- Handled 50+ customer inquiries daily with a 90% first-contact resolution rate using structured troubleshooting.
- Reduced escalations by 25% through stronger documentation, training and proactive issue identification.
- Partnered with product teams on 12 customer-requested features that improved product usability.
- Authored technical manuals and onboarding guides that reduced new-hire ramp-up time by two weeks.

SELECTED PROJECTS

AI-Powered Slack Alerting & Auto-Reporting

Built a Google Apps Script and webhook pipeline for real-time incident alerts; automated operational reports through APIs and added AI-assisted ticket-trend summarization for leadership visibility.

Edba – School/College Management Software

Developed institution-management workflows covering admissions, fees, daily operations and reporting; automated 15+ administrative processes and integrated payment and student-data systems.

InResto CPOS – Point of Sale Implementation

Owned multi-city rollout as SPOC, trained 50+ team members and reduced transaction errors by 30% through configuration and troubleshooting improvements.

LEADERSHIP & RECOGNITION

Cross-functional team leadership · C-level QBR facilitation · Incident communication · Process improvement · Employee of the Quarter ×2
